She also lounged on the beach

Alexis left little to the imagination as she posed topless and only wore a small red thong on the beach.

The 24-year-old spread her legs as she did a middle split near the edge of the water, while she also flaunted her impressive body as she exposed her breasts while lying down on the sand.

She continued to show off her physique as she casually stood naked while waiting for direction from the photographer and enjoyed time in the warm sun.

While taking a break from modeling, Alexis stayed warmed as she wrapped herself in a patterned light blue and purple patterned towel.

The Instagram model appeared to be accompanied by others during the beach outing, though she was the only member of the group that seemed to bare it all.

Alexis wasn't shy about flaunting her impressive body

The revealing photos likely won't surprise the model's 14.1 million Instagram followers, as she often flaunts her impressive bod in steamy snaps.

Her Instagram feed is full of sexy shots that show her in bikinis and flattering outfits.

Alexis got her start in modeling at the age of 13 when she booked a gig with the clothing store Brandy Melville.

She later became an Internet sensation at just 15 after photos of her posing in a black string bikini went viral on Tumblr.

Alexis continued to professionally model and even launched her own activewear line called Ren Active.

She continued her rise to fame when she competed on season 27 of Dancing with the Stars.
